

Silicone defoamer Tech-365W

Description

Tech-365W is a organic silicone emulsion as defoamer for water base systems. It has serious great ability and efficiency to defoam and foam inhibition even in the rather low addition level, especially for those plentiful micro-vesicle systems in coating and printing ink with the high value of viscosity. It is easy to disperse and low possibility to cause crater.

Physics and Chemical properties

Ingredient: Modified silicone

Appearance: White emulsion

Content: 50%

Solvent: Water

Specialty

1. Tech-365W defoamer is suit for water base coating systems, it could defoam as quickly as possible.
2. Tech-365W defoamer has the serious efficiency in defoam ability at the rather low level additive dosage, and appears very well.
3. Tech-365W has low possibility to cause crater.

Application System and Dosage

Tech-365W is recommended to use in the *water borne* coating systems.

Usually, it should be charged at the lapping stage during the produce with **0.05%** to **1.0%** dosage to gross.

Package

25kg pail or 180kg drum

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
