

Silicone defoamer Tech-321W

Description

Tech-321W is a organic silicone emulsion as defoamer for water base systems. It has high antifoaming efficiency at low addition. It is suitable for coating and printing ink. It is easy to disperse and low possibility to cause crater.

Physics and Chemical properties

Ingredient: Modified silicone

Appearance: White emulsion

Content: 20%

Solvent: Water

Specialty

1. Tech-321W defoamer is suit for water base coating systems, it could defoam as quickly as possible.
2. Tech-321W defoamer has the serious efficiency in defoam ability at the rather low level additive dosage, and appears very well.
3. Tech-321W has low possibility to cause crater.

Application System and Dosage

Tech-321W is recommended to use in the *water borne* coating systems.

Usually, it should be charged at the lapping stage during the produce with **0.05%** to **1.0%** dosage to gross.

Package

25kg plastic pail.

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability in advance.
