

Dispersant Tech-60701

Describe

Tech-60701 is an aqueous nonionic dispersant containing pigment-affinity groups, which has good dispersion ability for organic and inorganic pigments and good anti-floating and anti-flooding ability, without affecting the water resistance and salt spray resistance of paint films.

Physical and chemical parameters

Component: polymer containing pigment-affinity groups.

Appearance: yellow viscous liquid

Live fraction: 100%

Specificity

- ◆ Tech-60701 is suitable for water-based systems
- ◆ Tech-60701 has better anti-floating and anti-flooding performance.
- ◆ Tech-60701 does not affect the water resistance and salt spray resistance of paint film.

Application system and dosage

5%-15% for inorganic pigments and 30%-50% for organic pigments (depending on the specific surface area of pigments).

Packaging

25kg plastic pail
