

Anti-graffiti additive Tech-27510

Descriptions

Tech-27510 is a modified polysiloxane solution containing hydroxyl groups. Thanks to its unique chemical structure, it can form a monomolecular layer on the paint film surface with extremely high siloxane density. This significantly enhances the water resistance, slip, anti-staining, mold release, and anti-graffiti properties of the paint film, while providing an excellent feel.

Physics and Chemical properties

Ingredient: Modified Polysiloxane
Appearance: White Emulsion
Content: 50%
solvent: Water

Application System and Dosage

Suitable for two-component aqueous systems.

The dosage varies depending on requirements and can be 0.5% - 5% based on the total formulation.

Package

25kg

TECH Polymer

A company focus on additives since its birth

For research and development purposes only, there is no warranty of any kind, so please test its suitability.
